# FEATHER FLAG 3.2m

**FEATHER FLAG 3.2 m**
**900 x 2800 mm**
**ARTWORK GUIDELINES**

Crop all artwork within outer black line.

The first 'cyan' guide line represents the 30mm "bleed" zone which is occupied by the sleeve and hemmed edges. The second guide line represents the 60mm "safe" zone. Please leave all important artwork elements (such as text or featured images) on the inside of this guide. Background images or colours should bleed right through to the edge of the template for a seamless design.

All raster images used should be 150dpi and embedded in the file. Print quality will suffer with low resolution artwork.

All text should be "outlined", or the font file should be sent alongside artwork.

Use **CMYK** colours.

Save as a .pdf at "Press Quality".
