Eyeline® Pro Electric wall or ceiling mounted screens

A professional projection screen which offers an amazing array of standard features at a class beating price. High quality screen material provide a crisp flat surface for truly stunning results..

Suitable for both home and professional use and does not require electrical installation.

12 month guarantee.

Case and fabric

Heavy duty white powder coated aluminium case with front facing infra-red (IR) sensor built into casing. Matte White projection surface with 50mm black borders on base, left and right sides and extended black drop to the top. Glass fibre screen fabric prevents edge curl.

Operation

Four ways to operate the screen; Infra-Red Remote, 12v trigger, RJ45 connection to control system or manual override for fail safe use if remote lost or dead battery. Connectivity via left hand end cap supplied with cover plate if not used. Supplied complete with connectivity cables; External IR extension for use if built in receiver is obstructed; 10m 12v trigger for connection to a projector and a RJ45 connector for system integration.

Installation

Easy installations to wall or ceiling using channel fix mounting brackets. The brackets can be positioned anywhere along the screen length.

Tubular motor for fast, quiet and reliable operation is situated on the left hand side. Supplied with a 2.7m cable and plug for immediate 'plug and play' install. Also suitable for professional hard wire electrical installation.
