SET-UP INSTRUCTIONS **PRODUCT CODE**

Kit includes : Base, bungee pole set, two top rails and carry bag

① Assemble the bungee pole and insert into the base

② Lean the bannerstand backwards and extend each banner by lifting the top rail until the complete image is visible

③ Secure each banner into position by locating the bungee pole into the top rail slots

Locking pin

A spare locking pin can be found on the underside of the unit
(For use when changing banners)

Note:

1, Take care when lowering each banner to prevent damage to the graphic (do not drop)

2, When changing banners please refer to separate instruction sheet UI099

Technical Specification
Visible graphic area : 2145mm approx (H) x 600mm to 2000mm (W) depending upon the version supplied
Note : Add 200mm to the graphic length to allow for the roller
Unit weight inc. carry bag : 8kg approx (800mm version)

Guidelines for Graphic substrates
1, Material thickness must be between 225 and 300 microns in total
2, The substrate must be pliable and suitable for roller bannerstands
3, After fitting, the graphic should be left for 24 hours before use to ensure the adhesive bonds sufficiently
