Graphic panel face mounting kit

Assembly Instructions

Graphic panel face mounting kit – Thumb Screw

1

Slide 100mm connector bar down channel/s of post in front of which the rigid graphic panel/s are to be displayed.

2

Affix iPad enclosure to top of post, using 4 screws and hex key provided.

3

Slide connector bars into position so that middle thread is relative to holes in rigid graphic panel/s. Tighten both grub screws in connector bars to secure in position.

4

Position rigid graphic panel/s over assembled connector bars. Ensure that hole in graphic is aligned to thread of connector bar.

5

Insert thumb screws and tighten to secure graphic panel/s.
