

55" Superslim Freestanding Double-Sided Digital Posters

Dual-sided advertising displays with incredibly slim depth and striking brushed gold frame

Incredibly Thin Dual-Sided Display

The overall depth of this display is just 25mm; thinner than most single-sided displays. Not only does the exceptionally slim design attract more attention, but it also maximises manoeuvrability.

Stylish Elegant Frame

With a minimalistic framework design and high-end brushed gold finish, this unique display exudes luxury and is sure to grab attention in any location.

Lightweight Design

Integrated Android Media Player

Premium Brushed Gold Finish

Ultra-Resistant to Blackening Defect

IPS Panel

High Brightness Display (700cd/m²)

Easy USB Updates

Network Upgrade Available

24/7 Commercial Grade

Other Features

Display Different Content Each Side

The special Android media player can output two separate signals simultaneously. This means that with the networked version of this product, you can display different content on each screen at the same time.

Lightweight Design

Thanks to the segmented tubular design, this freestanding digital poster can be easily moved into position, making it fully portable.

Integrated Android Media Player

The built in Android media player inside the screen allows you to upgrade to a network version without needing any additional hardware. You can also install third party Android apps if required.

24/7 Commercial Grade

This is a true commercial grade solution. Built using high quality LCD panels and components, this solution is designed to be in constant use in public spaces.

High Brightness Displays (700cd/m²)

Both sides feature commercial grade high brightness IPS panels for accurately displaying image quality and colour depth with no fall-off in colour accuracy. These panels are designed to achieve ultimate lifelike colour temperature in portrait orientation.

IPS Panel

Commercial grade IPS technology accurately displays image quality and colour depth with no fall-off in colour accuracy. These panels are designed to achieve ultimate lifelike colour temperature and have a wide viewing angle.

Easy USB Updates

Plug and Play is the most straightforward way to upload content to the screen. Simply load images and videos onto a USB stick, insert into the display, wait for your content to copy over and then remove. Your images and videos will now play in a continuous loop.

Optional Network Upgrade

For a small charge you can upgrade your screen to be networked, allowing you to connect your screen via Wi-Fi, LAN or 4G, then remotely update it over the internet.
